

Mayer Fire District

P.O. Box 241
Mayer, Arizona 86333

August 1, 1996

**Mayer Water District Board
Mayer, Arizona**

Gentlemen:

Please be advised that the Mayer Fire District is currently planning to upgrade its radio communications system by replacing the radio repeater equipment and buildings currently existing on property now owned by the Mayer Water District. We request permission to cut a road through the property to the existing repeater site where we propose to construct a new 8' x 8' cement block structure to house the radio repeater equipment. The placement of this road would be to the discretion of the Mayer Water District Board. Enclosed is a site plan with the proposed placement of the new repeater housing relative to the existing structure and water tanks.

In addition, we also ask that a formal rental agreement for the radio communications site be prepared, agreed upon and signed by both the Mayer Fire District and the Mayer Water District Boards. The property was previously rented to the Mayer Fire District for a token one dollar per year and we request that this same amount be reinstated on the new rental contract.

Thank you for your consideration in these matters.

Dan Ritenour, Mayer District Fire Chief
